

Compendium – Oil and Gas Articles from The New York Times

Over the past several years, the New York Times has published numerous articles on the subject of oil and gas development across the country and internationally. This document contains more than 500 such articles via links to the New York Times website. The listing includes articles from early 2011 on up into June, 2014, plus a few from 2010. Most of the articles are fairly well-researched “news” pieces, some are “opinion” pieces, and some are “letters to the editor”. These articles are being submitted to San Miguel County to serve as partial guidance in the development of its Oil and Gas Ordinance.
